## Contactless Sheet Resistance/Resistivity Measurement Model 1800LS Flat Panel Display Mapping

- Perform non-destructive measurements
- Reduce costs
- Ideal for R&D & QA Environment
- Assure maximum target utilization
- Assure uniformity from panel to panel
- Detect non-uniformity caused by target wear
- Head size options: 14 mm or 2.5 inches
- Measurement range options:
  - Hi-range: 16 - 3000 ohms/sq.
  - Lo-range: 0.16 - 16 ohms/sq.
  - XLo-range: 0.035 - 1.6 ohms/sq.

### Model 1800LS Manual Measurement System

(Automatic positioning and mapping also available)

# LEI 1800AG
